Job Description: Machine Operator

Supervised by the Production Director you will be based in the Moulding Shop with duties including:

Machine Operating:

Operation of injection moulding machines – production of plastic parts. Each part must be carefully checked.

Trimming, packing and counting of mouldings.

Filling machine with material and closing down machine as required.

Quality Control:

Check to see that:

- a) material being used is the same as written on the Production Sheet.
- b) mouldings are to the same standard as the sample on the machine.

Assembly/Side Jobs:

Occasional finishing of products such as drilling holes, heat shrinking inserts, assembling parts, packing etc.

General:

General help within the factory as and when required. This may include cleaning and making drinks.
